

Interactive Pre-Recorded Poster Presentations

The Medical Student Orthopedic Symposium is excited to have you present. Unlike typical posters, we ask that you construct a **pre-recorded** “visual abstract”. A visual abstract is a single, concise, pictorial, and visual summary of the main finding(s) of your article.

Your audio recording for your poster presentation can be up to **3 minutes** maximum. The presentations will be played in Zoom breakout rooms. You will be in a room with other students and a moderator.

The deadline for submission of posters will be **March 31st, 2024, at 11:59 PM EST**. The link to submit the poster is in the acceptance email you received. Only PowerPoint files will be accepted for visual abstracts. You are limited to only **1 slide**.

Instructions:

Audio Recording

For instructions on how to make an audio recording on PowerPoint, we ask that you follow the instructions on the webpage below. Please make sure to put the microphone icon in the top right corner of your presentation to make it easy to find.

Visual Abstracts

The visual abstract should have a clear start and end, preferably "reading" from top to bottom or left to right. Reduce distracting and cluttering elements as much as possible.

1. Include the title at the top of the slide
2. Include the author and relevant citations at the bottom of the slide
3. Identify 1-3 key points from your study
4. Split the slide vertically to have a panel for each major point
5. Add visuals to convey each point. Images included can only be original or within the public domain. Copyright images will not be accepted.

Below are further instructions from other societies and Sample Interactive Posters you can use to model your presentation:
